

## PETAL Systematic reviews: PSE & PSEIC articles (n=83) 28/06/2024

1. Aguirrezabal, I., de San Román, M.S.P., Cobos-Campos, R., Orruño, E., Goicoechea, A., de la Eranueva, R.M., Arroniz, M. and Uzquiza, E., 2019. Effectiveness of a primary care-based group educational intervention in the management of patients with migraine: a randomized controlled trial. *Primary Health Care Research & Development*, 20, p.e155.
2. Amer-Cuenca, J.J., Pecos-Martín, D., Martínez-Merineró, P., Lluch Girbés, E., Nijs, J., Meeus, M., Ferrer Peña, R. and Fernández-Carnero, J., 2020. How much is needed? Comparison of the effectiveness of different pain education dosages in patients with fibromyalgia. *Pain Medicine*, 21(4), pp.782-793.
3. Andias, R., Neto, M. and Silva, A.G., 2018. The effects of pain neuroscience education and exercise on pain, muscle endurance, catastrophizing and anxiety in adolescents with chronic idiopathic neck pain: a school-based pilot, randomized and controlled study. *Physiotherapy theory and practice*, 34(9), pp.682-691.
4. Andias, R., Sa-Couto, P. and Silva, A.G., 2022. Blended-learning pain neuroscience education and exercise in high school students with chronic neck pain: a randomized controlled trial. *Physical Therapy*, 102(6), p.pzac048.
5. Ashar, Y.K., Gordon, A., Schubiner, H., Uipi, C., Knight, K., Anderson, Z., Carlisle, J., Polisky, L., Geuter, S., Flood, T.F. and Kragel, P.A., 2022. Effect of pain reprocessing therapy vs placebo and usual care for patients with chronic back pain: a randomized clinical trial. *JAMA psychiatry*, 79(1), pp.13-23.
6. Bagg, M.K., Wand, B.M., Cashin, A.G., Lee, H., Hübscher, M., Stanton, T.R., O'Connell, N.E., O'Hagan, E.T., Rizzo, R.R., Wewege, M.A. and Rabey, M., 2022. Effect of graded sensorimotor retraining on pain intensity in patients with chronic low back pain: a randomized clinical trial. *Jama*, 328(5), pp.430-439.
7. Barrenengoa-Cuadra, M.J., Muñoa-Capron-Manieux, M., Fernández-Luco, M., Angón-Puras, L.Á., Romón-Gómez, A.J., Azkuenaga, M., Etxebarria, A., Orrantia, G., Pikaza, A., Uribe-Etxebarria, L. and Zorrilla, A., 2021. Effectiveness of a structured group intervention based on pain neuroscience education for patients with fibromyalgia in primary care: A multicentre randomized open-label controlled trial. *European Journal of Pain*, 25(5), pp.1137-1149.
8. Bartley, E.J., LaGattuta, N.R., Robinson, M.E. and Fillingim, R.B., 2019. Optimizing resilience in orofacial pain: a randomized controlled pilot study on hope. *Pain Reports*, 4(2), p.e726.
9. Beltran-Alacreu, H., López-de-Uralde-Villanueva, I., Fernández-Carnero, J. and La Touche, R., 2015. Manual therapy, therapeutic patient education, and

therapeutic exercise, an effective multimodal treatment of nonspecific chronic neck pain: a randomized controlled trial. *American journal of physical medicine & rehabilitation*, 94(10S), pp.887-897.

10. Pardo, G.B., Gírbés, E.L., Roussel, N.A., Izquierdo, T.G., Penick, V.J. and Martín, D.P., 2018. Pain neurophysiology education and therapeutic exercise for patients with chronic low back pain: a single-blind randomized controlled trial. *Archives of physical medicine and rehabilitation*, 99(2), pp.338-347.
11. Burke, A.L., Denson, L.A. and Mathias, J.L., 2016. Does a brief educational session produce positive change for individuals waiting for tertiary chronic pain services?. *Pain Medicine*, 17(12), pp.2203-2217.
12. Castro, J., Correia, L., de Sousa Donato, B., Arruda, B., Agulhari, F., Pellegrini, M.J., Belache, F.T., de Souza, C.P., Fernandez, J., Nogueira, L.A. and Reis, F.J., 2022. Cognitive functional therapy compared with core exercise and manual therapy in patients with chronic low back pain: randomised controlled trial. *Pain*, 163(12), pp.2430-2437.
13. Ceballos-Laita, L., Mingo-Gómez, M.T., Estébanez-de-Miguel, E., Bueno-Gracia, E., Navas-Cámara, F.J., Verde-Rello, Z., Fernández-Araque, A. and Jiménez-del-Barrio, S., 2021. Does the addition of pain neurophysiology education to a therapeutic exercise program improve physical function in women with fibromyalgia syndrome? Secondary analysis of a randomized controlled trial. *Journal of Clinical Medicine*, 10(11), p.2518.
14. Ceballos-Laita, L., Mingo-Gómez, M.T., Navas-Cámara, F., Estébanez-de-Miguel, E., Caudevilla-Polo, S., Verde-Rello, Z., Fernández-Araque, A. and Jiménez-del-Barrio, S., 2020. Therapeutic exercise and pain neurophysiology education in female patients with fibromyalgia syndrome: A feasibility study. *Journal of Clinical Medicine*, 9(11), p.3564.
15. dos Santos Aguiar, A., Bataglioni, C., Felício, L.R., Azevedo, B. and Chaves, T.C., 2021. Additional effect of pain neuroscience education to craniocervical manual therapy and exercises for pain intensity and disability in temporomandibular disorders: a study protocol for a randomized controlled trial. *Trials*, 22, pp.1-12.
16. Dragesund, T., Nilsen, R.M. and Kvåle, A., 2021. Norwegian Psychomotor Physiotherapy versus Cognitive Patient Education and active physiotherapy—A randomized controlled trial. *Physiotherapy Research International*, 26(2), p.e1891.
17. Meise, R., Carvalho, G.F., Thiel, C. and Luedtke, K., 2023. Additional effects of pain neuroscience education combined with physiotherapy on the headache frequency of adult patients with migraine: A randomized controlled trial. *Cephalalgia*, 43(2), p.03331024221144781.
18. Vibe Fersum, K., Smith, A., Kvåle, A., Skouen, J.S. and O'Sullivan, P., 2019. Cognitive functional therapy in patients with non-specific chronic low back

pain—a randomized controlled trial 3-year follow-up. *European Journal of Pain*, 23(8), pp.1416-1424.

19. Galan-Martin, M.A., Montero-Cuadrado, F., Lluch-Girbes, E., Coca-López, M.C., Mayo-Isicar, A. and Cuesta-Vargas, A., 2020. Pain neuroscience education and physical therapeutic exercise for patients with chronic spinal pain in Spanish physiotherapy primary care: a pragmatic randomized controlled trial. *Journal of clinical medicine*, 9(4), p.1201.
20. Gallagher, L., McAuley, J. and Moseley, G.L., 2013. A randomized-controlled trial of using a book of metaphors to reconceptualize pain and decrease catastrophizing in people with chronic pain. *The Clinical journal of pain*, 29(1), pp.20-25.
21. Gardner, T., Refshauge, K., McAuley, J., Hübscher, M., Goodall, S. and Smith, L., 2019. Combined education and patient-led goal setting intervention reduced chronic low back pain disability and intensity at 12 months: a randomised controlled trial. *British journal of sports medicine*, 53(22), pp.1424-1431.
22. Gorji, S.M., Mohammadi Nia Samakosh, H., Watt, P., Henrique Marchetti, P. and Oliveira, R., 2022. Pain neuroscience education and motor control exercises versus core stability exercises on pain, disability, and balance in women with chronic low back pain. *International journal of environmental research and public health*, 19(5), p.2694.
23. Greenwood, J., McGregor, A., Jones, F. and Hurley, M., 2019. Rehabilitation following lumbar fusion surgery (REFS) a randomised controlled feasibility study. *European Spine Journal*, 28, pp.735-744.
24. Gül, H., Erel, S. and Toraman, N.F., 2021. Physiotherapy combined with therapeutic neuroscience education versus physiotherapy alone for patients with chronic low back pain: A pilot, randomized-controlled trial. *Turkish journal of physical medicine and rehabilitation*, 67(3), p.283.
25. Ilgen, M.A., Coughlin, L.N., Bohnert, A.S., Chermack, S., Price, A., Kim, H.M., Jannausch, M. and Blow, F.C., 2020. Efficacy of a psychosocial pain management intervention for men and women with substance use disorders and chronic pain: A randomized clinical trial. *JAMA psychiatry*, 77(12), pp.1225-1234.
26. Imai, R., Konishi, T., Mibu, A., Tanaka, K. and Nishigami, T., 2021. Effect of pain neuroscience education and exercise on presenteeism and pain intensity in health care workers: A randomized controlled trial. *Journal of occupational health*, 63(1), p.e12277.
27. Rabiei, P., Sheikhi, B. and Letafatkar, A., 2023. Examining the influence of pain neuroscience education followed by a Pilates exercises program in individuals with knee osteoarthritis: a pilot randomized controlled trial. *Arthritis Research & Therapy*, 25(1), p.94.

28. James, J., Selfe, J. and Goodwin, P., 2021. Does a bespoke education session change levels of catastrophizing, kinesiophobia and pain beliefs in patients with patellofemoral pain? A feasibility study. *Physiotherapy Practice and Research*, 42(2), pp.153-163.
29. Javdaneh, N., Saeterbakken, A.H., Shams, A. and Barati, A.H., 2021. Pain neuroscience education combined with therapeutic exercises provides added benefit in the treatment of chronic neck pain. *International journal of environmental research and public health*, 18(16), p.8848.
30. Jensen, M.P., Mendoza, M.E., Ehde, D.M., Patterson, D.R., Molton, I.R., Dillworth, T.M., Gertz, K.J., Chan, J., Hakimian, S., Battalio, S.L. and Ciol, M.A., 2020. Effects of hypnosis, cognitive therapy, hypnotic cognitive therapy, and pain education in adults with chronic pain: a randomized clinical trial. *Pain*, 161(10), pp.2284-2298.
31. Karran, E.L., Hillier, S.L., Yau, Y.H., McAuley, J.H. and Moseley, G.L., 2018. A quasi-randomised, controlled, feasibility trial of GLITtER (Green Light Imaging Interpretation to Enhance Recovery)—a psychoeducational intervention for adults with low back pain attending secondary care. *PeerJ*, 6, p.e4301.
32. Khosrokiani, Z., Letafatkar, A., Hadadnezhad, M. and Sokhanguei, Y., 2022. Comparison the effect of pain neuroscience and pain biomechanics education on neck pain and fear of movement in patients with chronic nonspecific neck pain during the COVID-19 pandemic. *Pain and therapy*, 11(2), pp.601-611.
33. Kim, K.S., An, J., Kim, J.O., Lee, M.Y. and Lee, B.H., 2022. Effects of pain neuroscience education combined with lumbar stabilization exercise on strength and pain in patients with chronic low back pain: randomized controlled trial. *Journal of personalized medicine*, 12(2), p.303.
34. Kohns, D.J., Urbanik, C.P., Geisser, M.E., Schubiner, H. and Lumley, M.A., 2020. The effects of a pain psychology and neuroscience self-evaluation internet intervention: a randomized controlled trial. *The Clinical Journal of Pain*, 36(9), pp.683-692.
35. Law, E.F., Groenewald, C.B., Zhou, C. and Palermo, T.M., 2018. Effect on health care costs for adolescents receiving adjunctive internet-delivered cognitive-behavioral therapy: results of a randomized controlled trial. *The Journal of Pain*, 19(8), pp.910-919.
36. Lluch, E., Dueñas, L., Falla, D., Baert, I., Meeus, M., Sanchez-Frutos, J. and Nijs, J., 2018. Preoperative pain neuroscience education combined with knee joint mobilization for knee osteoarthritis: a randomized controlled trial. *The Clinical journal of pain*, 34(1), pp.44-52.

37. Louw, A., Diener, I., Landers, M.R. and Puentedura, E.J., 2014. Preoperative pain neuroscience education for lumbar radiculopathy: a multicenter randomized controlled trial with 1-year follow-up.
38. Louw, A., Diener, I., Landers, M.R., Zimney, K. and Puentedura, E.J., 2016. Three-year follow-up of a randomized controlled trial comparing preoperative neuroscience education for patients undergoing surgery for lumbar radiculopathy. *Journal of Spine Surgery*, 2(4), p.289.
39. Malfliet, A., Kregel, J., Coppieters, I., De Pauw, R., Meeus, M., Roussel, N., Cagnie, B., Danneels, L. and Nijs, J., 2018. Effect of pain neuroscience education combined with cognition-targeted motor control training on chronic spinal pain: a randomized clinical trial. *JAMA neurology*, 75(7), pp.808-817.
40. Malfliet, A., Kregel, J., Meeus, M., Roussel, N., Danneels, L., Cagnie, B., Dolphens, M. and Nijs, J., 2018. Blended-learning pain neuroscience education for people with chronic spinal pain: randomized controlled multicenter trial. *Physical therapy*, 98(5), pp.357-368.
